PRIMARY APPLICATIONS

DESCRIPTION

BEA's LPR36 is a 36 inch actuator that exceeds all local ADA building codes requiring high and low actuators, eliminating the need to install two separate devices.

This stainless steel plate utilizes four highly-sensitive membrane switches that require very little force and ensure actuation across the entire surface. This functionality enhances accessibility for those with limited mobility or disabilities.

Available in wireless and hard wire versions, the LPR36 can be conveniently mounted in a variety of locations.
