RF Keypad Transmitter

The RF Keypad is used with any gate or garage door opener that consists our P294-K receiver or compatible receiver. The RF keypad will transmits once after you enter correct Code. The keypad will not affect the autoclose setting of your gate opener.

The keypad will shut down for approx. 40 seconds if your entry code is not correct within a string of 18 digits. This will discourage an unauthorized person from trying to use random numbers to access your property.

Safety Note : Never install the RF keypad where a person can touch the gate while activiting the keypad.

Programming the Keypad

Program Transmitter Dip Switch setting into the R.F. Keypad
1. Open the Transmitter to find out the dip switches setting.
   Each of the 9 dip switches has 3 setting (+, o, -)
