# 831RE 24VAC Wiring

Wiring:

At the receiver run one **orange** and one **black** wire back to the **common** at the door operator panel.

At the receiver connect the other **orange** wire to the **open** command at the door operator panel.

At the receiver connect the other **black** wire to the **close** command at the door operator panel.

At the door operator panel find and disconnect the **stop** wire coming from the 3 button station on the wall. Reconnect this **stop** wire from the 3 button station to one of the **gray** wires coming from the receiver. Connect the other **gray** wire from the receiver to the **stop** command at the door operator panel.

At the receiver connect 24VAC to the **red** and **white** wires.
