

**Manual  
Connector wire no. 913**

**Connector Wire:**

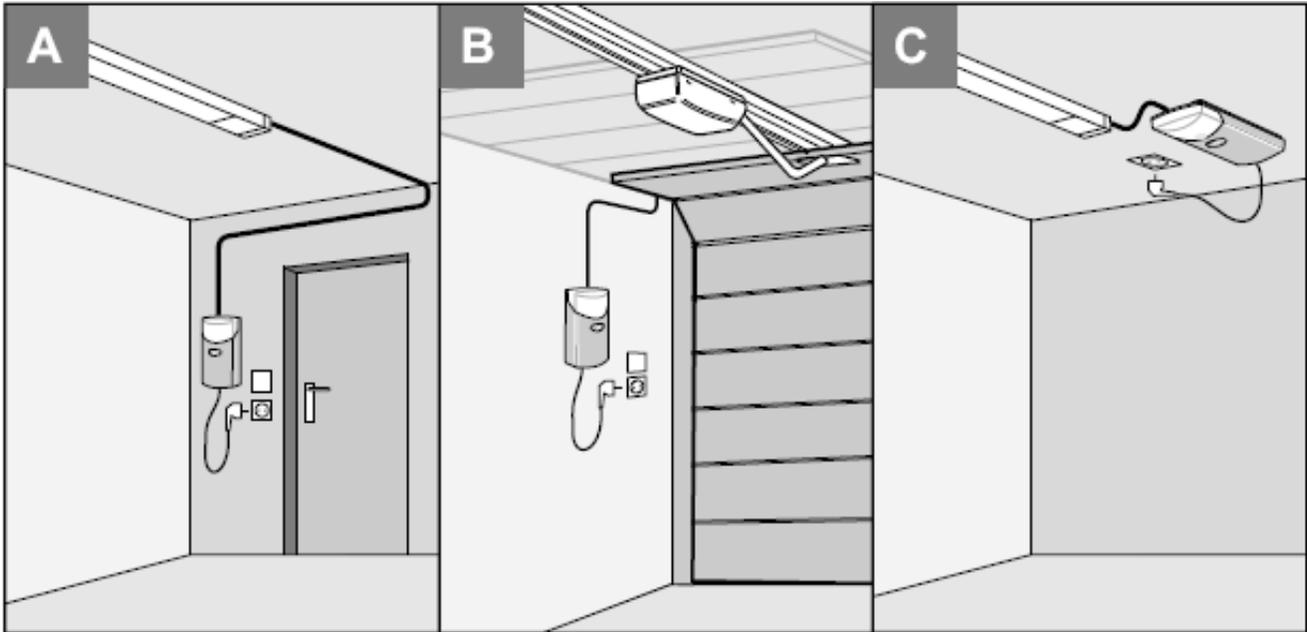

- Allows to detach the head apart from the rail wherever it suits best
- Ideal for small garages or where back beams would be in the way
- Easy 24 Volt wiring and easy installation without the need of an electrician  
Standard length is 16' and can be shortened

## Mounting options

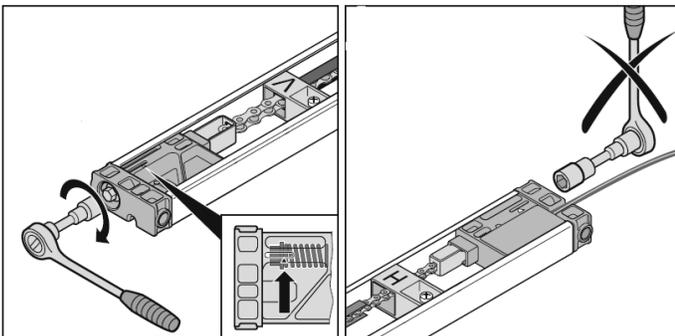

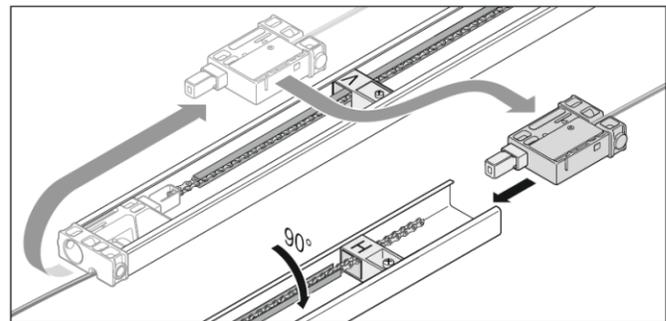

Wall mount back

Wall mount front

Ceiling mount

-Assemble opener with connector wire

-Do not tighten the connector wire slide in part

- Install opener . More information about installation: please refer to the manual
- Open opener head housing and mount head to desired location
